

DISCHARGE SUMMARY

Patient: Priya Nair MRN: SYN-DC-1002 DOB: 1990-11-22
Admission Date: 2026-05-10 Discharge Date: 2026-05-12
Attending Physician: Dr. R. Iyer, General Surgery

PRIMARY DIAGNOSIS

Acute appendicitis, status post laparoscopic appendectomy.

HOSPITAL COURSE

Patient presented with 18-hour history of right lower quadrant abdominal pain, nausea, and low-grade fever (38.1C). Abdominal ultrasound and subsequent CT confirmed acute appendicitis without perforation. Patient underwent uncomplicated laparoscopic appendectomy on day of admission. Postoperative recovery was unremarkable; patient tolerated oral diet on postoperative day 1 and ambulated without difficulty. Pain well-controlled with oral analgesics.

DISCHARGE MEDICATIONS

1. Ibuprofen 400mg PO every 6 hours as needed for pain.
2. Acetaminophen 500mg PO every 6 hours as needed, do not exceed 3000mg/day combined.

FOLLOW-UP INSTRUCTIONS

Follow up with general surgery clinic in 2 weeks for wound check. Avoid heavy lifting (>10 lbs) for 4 weeks. Return to ED if fever above 38.5C, increasing abdominal pain, or wound drainage occurs.
