

RADIOLOGY REPORT

Patient: Priya Nair MRN: SYN-DC-1002 DOB: 1990-11-22
Study Date: 2026-05-10 Modality: CT Region: Abdomen and Pelvis with Contrast
Radiologist: Dr. A. Singh, MD

FINDINGS

The appendix is dilated, measuring 11mm in diameter, with surrounding fat stranding and a small amount of free fluid in the right lower quadrant. No appendicolith identified. No evidence of free air to suggest perforation. Liver, spleen, and kidneys appear unremarkable on visualized portions of the scan.

IMPRESSION

1. Findings consistent with acute appendicitis, without evidence of perforation. 2. Recommend surgical consultation.
